# EFFIZIENT

Gain Efficiency in Material Handling

Made in the USA

The Grocery Stocking Cart is designed to hold and move heavy merchandise. You will experience less product damage, easier maneuverability and higher efficiency when restocking your store displays.

## Benefits:

- ☐ Available as 2 or 3 sided version
- ☐ Up to 8 different shelf heights
- ☐ Improved back-room organization
- ☐ Better product visibility
- ☐ Different caster configurations available
- ☐ Heavy duty construction
- ☐ Ships fully assembled
- ☐ Compact design for in-aisle maneuverability
- ☐ Customized sizes available
- ☐ Comprehensive two year warranty

## Specifications

|                                                                                  |           |                        |               |
|----------------------------------------------------------------------------------|-----------|------------------------|---------------|
| Dimensions (W x L):                                                              | 23" x 48" | Load Capacity Static:  | 2,500 lb.     |
| Total Height:                                                                    | 66"       | Load Capacity Dynamic: | 1800 lb.      |
| Effective Height:                                                                | 56.5"     | Volume:                | 29 cubic feet |
| Weight depends on configuration: (i.e. 2-sided version with 5 shelves = 125 lb.) |           |                        |               |
